

Bird Watching

Name: _____

Date: _____

Birds are everywhere! Head outside to observe and draw the birds. Then use this guide to identify the birds you see. There are over 400 birds in the area, so if your bird isn't below, check the Merlin Bird ID app from Cornell University.

Some birds like different kinds of weather. Was it sunny, cloudy, or rainy when you looked for birds?

Some birds only appear in the morning or night. What time was it when you looked for birds?

Draw your bird here:

What is the bird called?
