

Build an Intertidal Animal

Name: _____

Date: _____

The **Intertidal Zone** is the area along a shoreline that experiences changes throughout the day due to tides. Animals in this area (such as crabs, sea stars and barnacles) must be ready to deal with many harsh changes including crashing waves, lack of water, hot sun, and exposure to predators.

Think of one adaptation/feature an animal living in the intertidal zone may have to address each of the following issues and draw the animal you create then give it a name.

- Finding/catching food: _____
- Protection: _____
- Movement: _____

Hello, I am a _____.
